## Developments

Profile information on every property development in the market. Each development profile includes information such as development Stage, Project Type, Store Name, Owner, Address, etc.

Learn about how Square Footage is estimated for developments

The square footage of developments is estimated by calculating a weighted average of the square footage of other stores with known square footage in the same state.

The weights are based on the year the stores were built: 40% for developments. | 30% for stores built in 2024 or later. | 20% for stores built before 2024. | 10% for stores whose year of construction is unknown.

If square footage value is not known for any other stores in the state, the national weighted average is taken as the estimated square footage value.

## All Stores List

Profile information on every store in the market. Store profile information includes the Store Name, Store Address, Total Rentable Square Footage, Year Opened, Company owner and/or Operating Company, Rate Volatility over the past 30 days.

**Total Square Feet** values displayed here are obtained from public sources, including city and county property records. When this information is unavailable, StorTrack uses mapping tools or internal models to estimate the size of the property - such properties have an asterisk (\*) next to their Total Square Feet value.

How is Rentable Square Feet (RSF) calculated for each property?

RSF is 95% of TSF if the property has 1 floor | RSF is 85% of TSF if the property has 2 floors | RSF is 75% of TSF if the property has 3 or more floors | RSF is 95% of TSF if the property has an unknown number of floors

## StorTrack's Marketing Scorecard

The StorTrack Marketing Scorecard is a scoring mechanism for judging the activity and effectiveness of a Store's local marketing. This enables us to create a methodology for comparison and competitive insight.

The Scorecard is created by monitoring five different areas of a Store's marketing activities. StorTrack has created a weighted scoring process for each of these five categories. The category scores are what you see on the Marketing Scorecard page.

### Website (25 Points)

The Website Content scoring is based on the availability of the below factors: Multiple pages, Navigation, Photos, Video, Map/Directions, Reviews/Testimonials	0-7 Score
Online Pricing for the store is based on the pricing data available online and the volatility.	0-7 Score
Online promotions is based on the promotion advertised for the unit types and on the Home page of the store website.	0-5 Score
The Metadata score is based on the search options available for finding a location, a sitemap, a search box to identify a specific page, etc.	0-3 Score
Direct booking engine is scored based on the website ability to complete an online rental/reservation.	0-3 Score

### Search (Nonorganic) (35 points)

The score for the store is determined based on the order of the search result occurrence and the results within the Advertisement content section on the first page of the search results. The scores are listed below based searching on the following platforms with the keywords "self-storage [city name]".

Buys Google Adwords	0-12 Score
Buys Bing Ads	0-9 Score
